TAKES THE HEAT OUT OF THE ENVIRONMENT

Fuel Storage Tank

Shell Philippines applies Solacoat Heat & Solar Reflective Paint to its Fuel Storage Tanks

Shell Philippines has decided after much investigations into the various Heat Reflective Products available around the world, on Solacoat Heat & Solar Reflective Paint Coating to be applied to one of its large fuel storage tanks to assist in reducing its annual fuel losses due to evaporation.

Shell is now considering applying Solacoat Heat & Solar Reflective Paint Coating to its remaining 79 Fuel storage tanks, which will also assist in reducing GreenHouse Gas emissions going into the Environment, plus the added bonus of saving millions of dollars annually lost in Fuel
