Attention Mr.Ivan Dan Li  
Mr.Max Chua

Dear Sirs

**Re: Solacoat Heat Reflective Solutions**

It has been three (3) months since our Admin Building concrete roof was coated with your **Solacoat Heat Reflective Solutions**.

We can now confirm that the Solarcoat coated surfaces are now much more cooler than before as we have monitored the surface temperature with an outdoor Mercury thermometer to track the ambient temperature before and after the application of your coated solutions...the temperature recorded an unbelievable drop of 58 degree C to 37 degree C and this needless to say has improved tremendously our energy efficiency and consumption.

In recognition of the good work done and most of all our significant energy bill savings over the past couple of months and for the future, we would strongly recommend your Company's **SOLACOAT HEAT REFLECTIVE SOLUTIONS** to any company and/or buildings for their *energy conservation and efficiency*.

Also we would welcome any of your prospective customers to view our building as your good reference.

We wish your Company continued success in your products and care of the environment.

Yours faithfully  
Gaylin International Pte Ltd

Desmond Teo  
Managing Director
