Dear Dan,

RE : Solar Reflective Coating – SolaCoat

We wish to formally acknowledge our satisfaction to you for introducing SolaCoat to us. The SolaCoat heat reflective solution we applied on the roof of our premises late last year is yielding amazing overall results.

Being in the business of construction and renovation, our Joo Chiat pre-war shop-house is used as our main office as well as warehousing and employee lodging.

As you have confidently related to us, our roofs which are mainly of galvanized material are much cooler and bearable after applying with SolaCoat.

With the roof surface temperature drastically reduced, heat is no longer radiating into our building. This effect has brought upon better comfort for our staff and customers alike.

It is now obvious that the internal temperature of our office is lower than before since a large amount of solar induced heat are being reflected away by SolaCoat, as such, we are confident that we would be able to enjoy some reduction in our air-conditioning energy cost since our aircon units are functioning more efficiently with lowered heat load.

We are very happy with the features and benefits of SolaCoat and your professional services. We will not hesitate to recommend your heat reflective solution to all our customers.

Thank you and we wish MI Comm. success with SolaCoat.

Yours Sincerely

Christopher Tan
Business Director
